10am-6pm

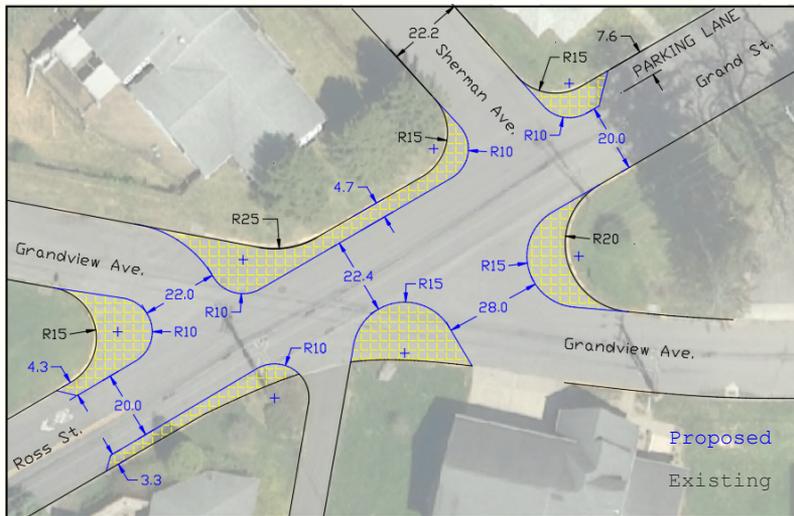

Pop-up traffic calming on Ross and Grand Streets

What is traffic calming?

Traffic calming makes streets safer by reducing how often and how fast people speed as they drive. Slower speeds help to reduce crashes and their severity, especially for those who walk and bike.

What is a pop-up?

"Pop-up" means an informal, short-term event that uses things like traffic cones to temporarily change parts of the street. When neighbors request traffic calming, these pop-ups help the City test different ways of slowing speed. They also give you a sense of how your street might feel if we made these changes permanent.

Look for "curb extensions" and "bump outs" all along the Ross and Grand Corridor between Euclid and Dorsey, as seen above at the five-way intersection.

When?

Wednesday, May 5th, 10am-6pm
Followed by a Traffic Commission meeting at King St. Park
